## PROFESSIONAL EXPERIENCE

### Backend NodeJS Developer - Freelance Remote

#### Propsion

01/2023 – 06/2024 London, England

- Collaborated with the team to implement new features and refactor existing code.
- Improved system quality by writing unit and integration tests, documenting APIs with BPMN, Swagger, and Postman, and applying best practices.
- Established CI/CD pipelines with GitLab for automated testing and deployments.

### Full-Stack JAVA/ANGULAR Developer - Freelance Remote

#### FOSE MAROC

11/2023 – 05/2024 Rabat, Morocco

- Built an internal restaurant platform using Spring Boot 3, Angular 16, Angular Material, and AWS.
- Platform allows managers to easily organize weekly menus and set meal purchasing times for employees, offering meal discounts based on their salary scales and providing sales statistics and charts for government reporting.

### Full-Stack JAVA/ANGULAR Developer - Freelance Remote

#### Noble Sense

05/2023 – 11/2023 Strasbourg, France

- Developed a multi-universe e-commerce platform using Spring Boot 3, Angular 17, Bootstrap 5, and AWS cloud.
- Organized the platform into distinct universes, each containing related categories and several products, facilitating easy navigation and purchasing.

### Full-Stack JAVA/ANGULAR Intern

#### MustaPro

07/2023 – 09/2023

- Implemented a microservices architecture that enhanced application flexibility and resilience, capable of handling high traffic volumes while maintaining excellent user experience.
- Developed a dashboard that aids the owner in managing resources and monitoring rental progress through various KPIs, improving decision-making.
- Utilized tools like Spring Cloud 2022.0.0-RC2, Spring Security Keycloak, Docker, Docker-compose, and Angular for development and deployment.

## EDUCATION

### Computer Engineering

#### École Nationale des Sciences Appliquées

09/2022 – 06/2024

### Bachelor in Mathematics and Computer Science

#### University Hassan II of Mohammedia

09/2019 – 06/2021

## SKILLS

Java Javascript Typescript  
NodeJS Java EE Angular  
JUnit Mockito Karma  
Docker Kubernetes Jenkins  
AWS Microservices Spring Cloud  
SQL NoSQL Git  
Prometheus Grafana Agile Methodologies

## AWARDS

- 4th Place at the National Hackathon of EnsetM 2023
- Top of the class in JAVA/JEE, web development at École Nationale des Sciences Appliquées de Berrechid 2022
- Top of the class in C, shell scripting, Linux language at University Hassan II of Casablanca 2020
